Affiliate Marketing Commissions Today!

The EASIEST Affiliate Commissions you'll ever make! PERIOD

Did you know that there's a very simple way to make affiliate commissions, you can literally tap in to buyer traffic and get people buying stuff through YOUR AFFILIATE LINK EASY.. and at the same time Boosting conversions up to 5 Times or more?

No... Then listen up. I'll explain exactly how to do it and why this is now possible. When you hear what I'm about to tell you... you'll be as amazed as I was, and I'm willing to bet you'll hop over to clickbank or JVzoo looking for an affiliate product to promote before you finish reading this PDF (You won't be able to help yourself)

What Nobody Will Tell You...

I write this from my own point of view, but as I do I can imagine many of you reading will feel exactly the same.

So let me ask you; do you find it easy to make money online? I bet the answer is no... the fact is while there are lots of ways to make money online most of the time applying those methods requires quite a bit of time and money.

And if you're anything like me you've probably tried this and tried that with little to no success... am I right? OK, so we usually only get to hear about the obvious stuff that everyone talks about... and the fact that everyone does it means... well it simply means it's been done to death. And in most cases that equates to wasted time and wasted money.

I'm sure I'm not the only one who feels this way...

Anyway, to cut a long story short... I found a simple affiliate marketing strategy that is both easily scalable and duplicable and ultimately.. extremely profitable :)

...Here's how it works

(before I begin.. For those of you just starting out with zero list and no idea how to get traffic, don't worry I've got you covered.. later in this guide I show you a simple strategy you can use to start seeing some traction.. and make your first affiliate Sale TODAY!)

Anyways the strategy is fairly simple ..You see whenever you promote an affiliate offer with whatever traffic you have you really need to heavily **INCENTIVIZE** the potential buyer to buy the offer from **YOUR Affiliate** link. I know some of you reading this may have seen some marketers doing this, where they offer some bonuses to

buy from their affiliate link.

BUT the problem with this method I see most marketers make as that the BONUS is not good enough or they offer too little bonuses to INCENTIVIZE the purchase.

What I recommend you as a marketer do instead.

- Have at least MINIMUM 5 - 10 Bonus offers (Digital download) this could be high quality PLR or your OWN products
- All bonuses must be ideally visually displayed in a page (This will give them an idea of what their getting) this is commonly referred to as a “promo page”
- Offer access to a premium Membership site.. This is HUGE HUGE HUGE.. did I mention this is huge?< this will sky rocket your affiliate earnings big time
- Offer some kind of coaching element < This is easy to do, but can be time consuming if you're doing a ton of this .

Bonus delivery is also made easier with platforms like Jvzoo & Warriorplus. Here's a step by step instruction for Jvzoo bonus Delivery.

STEP # 1: go to Approved Products in Jvzoo (Obviously you need to be approved first to promote the product

STEP # 2 : Select the product you'd like to create a bonus for, and hit “add Extra” in my screenshot example below

STEP # 3 : Click “Add Bonus” and you'll see , enter the name of your bonus and your BONUS URL page (where they can download the promised bonuses)

By using this bonus delivery method you don't even need to verify any purchases or

What products to promote?

I HIGHLY recommend you only promote **software** products, they convert the best for me and are an easier sell compared to say ebooks or e-courses. Software will be your #1 priority.. they last far longer too and can be sold for years from my experience.

Where do I find software products to promote?

I usually headover to Jvnotifypro.com or mucheye.com and see whats being launched there :) Select a a software product that has a good payout, at the time of writing 50% commission is what I usually aim for. You will need to go though each of the product to determine if its a software or not.. Once you

When I personally first started out with no track record I was still able to get approved for a lot of products, so don't worry if you're brand new :)

Anyways

To illustrate how I personally implement the exact strategy in my online business let me give you some case Studies here.

Case Study # 1 Clickmagick Promotion

I'm promote a click tracking software called clickmagick which gives me 33% commissions (Recurring) on some of my PDF reports and I Offer PLATINUM access to my PLR membership site as a bonus if they use my Affiliate link instead of just subscribing to the software elsewhere. This is a huge bonus and has a huge perceived value so naturally many took it up!

All I did was In all my free reports and free training I always talk about Clickmagick software and remind them that they can take advantage of my 1uplr PLATINUM membership site which is a premium membership site if the sign up under my link

Here's a screenshot of my earnings so far, this is just earnings from just slightly over a year.

Case Study # 2 , Hostgator Webhosting Affiliate Program

In a nutshell Hostgator is a hosting company with an affiliate program that pays up to \$125 per sale

I was able to generate thousands of dollars In affiliate commissions with one stupid youtube video. It Took me only 14 minutes or so to do this.

-4 minutes and 25 seconds to record the video -About 4 minutes to process the video -About 1 minute to upload the video -About 4 minutes to upload the descriptions and text on the video.

I have kept this video somewhat of a secret for a long time but Yes I was able to generate thousands of dollars In affiliate commissions with a single video on youtube :D

This Video that made me thousands of dollars In Affiliate commissions with and it is still running till this very day. This video was made back in 2010

Video Link ==> <http://www.youtube.com/watch?v=5r1NeUmhZSI>

The Idea Behind This Video

Usually before anyone buys something online these days, they will do a quick Google search for reviews if they want to learn more of the product or coupons to get a discount.

In the video I'm promoting Hostgator (a hosting service) and if anyone searches on Youtube for Hostgator terms like:

Hostgator ,Hostgator Review, Hostgator Coupon code and a number of other hostgator terms, they are most likely looking to get Hostgator web hosting...and my video will appear in the search results.

So when they click on my video, I explain to them why Hostgator is a very good hosting service and I tell them to use my special coupon code to get all the Private Label Rights products.

The Idea is to get people to use your custom made coupon code (which you will get commissioned for) and give them a Bonus/incentive to do so using your coupon code in my video above it's a bunch of PLR products.

Hostgator webhosting affiliate program pays you up to \$125 per signup and you can create customized coupon codes when people sign up with your coupon code during checkout.. you'll get the commissions. It's that easy!

Yeah I'm actually showing this little case study, I don't mind doing that because... well because I have found a ton of much better ones so I don't really care if somebody grabs this one at all :)

I have done many similar promotions in the past not just on youtube but across multiple platforms and traffic sources. The key here is to HEAVILY Incentivize a visitor to take up the offer with your affiliate link..

Sounds Easy and Fun right?

Err EASY Yes.. Fun... not really..

While it seems so easy to make affiliate commissions with this strategy, I did come across some problems along the way..

Now let me address each of these problems:

Problem # 1 – Coming up with promo pages, (Keeping bonuses Organized)

You need to come up with a PROMO page, which is basically a page that explains what they get buying from your affiliate link, its ideal that your visitor has a visual idea of what they are getting, the more they can PICTURE in their head what the bonuses is like, the higher your conversion rates!

Problem # 2 – Delivery of Bonuses

When you have a ton of bonuses and you're also doing a ton of affiliate promo's things can get pretty messy,, because you need to create bonus delivery pages (the page they can download their bonuses) for each individual promo! Imagine if you offer 20 or 30 individual bonuses and you're running more than 1 affiliate campaigns, you can potentially miss some of them while creating these bonuses and get a lot of support emails which YOU need to trouble shoot :(.. not fun

Problem # 3 – Speed of coming with these little Promo pages and delivery bonus page.

>This was my biggest problem to be honest. Although I could rotate the bonuses with different bonuses from time to time.. coming up with the promo bonus page and delivery of bonuses take up a lot of my time..

I wanted something more automated.

I really hated the idea that it takes me about 1 hour to create the promo and bonus delivery pages for ONE single product..

THE GOOD NEWS.. Thankfully I found a **SUPER-FAST** Solution to all the problems above for myself to Speed things up.. the software that saved me a ton of time...

From 1 hour to 1 minute..

These days I use CommissionGorilla web based software to do everything above with just a fraction of the time.. what used to take me an hour or so now just takes me a minute..

In a nutshell what this software allows you to upload all your bonuses or free gifts and categorized them on their site, and also creates the **Promo page** and the **Bonus delivery page** all with just a few clicks of a button.

- + No Installation required.
- + No website required. (All hosted on their FAST SERVERS)
- + Drag & Drop editor
- + Clone Bonus templates < this allows me to quickly clone everything change a few text and I'm now promoting a new product!
- + All bonuses and pages stored for you (so you can easily access them whenever you need it)

Oh and by the way here is a sample of a PROMO page (In this example I'm promoting Commission Gorilla.)

>> Sample PROMO PAGE

[Here is the full details of what the software does \(Click here to see it for yourself\)](#)

Creating bonus delivery pages is so fast and easy and I can just focus doing more affiliate promos. What I also like about this is that even a newbie can implement this, you don't even need a website because they host everything for you.

This software and stores all your Bonus graphics for you too so you can always reuse them whenever..

This software is what you really need to take your affiliate marketing to a whole new level.

Seriously.. this software is a HUGE time saver and a money making machine for me.

FREE TRAFFIC method - The Product LAUNCH Jacking method.

Now as promised the FREE traffic method that works like gangbusters..

So, there are almost new product launching every single day in the IM (internet marketing) niche right?... I don't need to tell you the obvious but Product launching is huge and people are launching one product after another every single day like they are going out of fashion.

Tens of thousands of digital products are being sold every single day from launches. Marketers and affiliates will constantly promote affiliate products to their list and create a “buzz” during a launch and as a result many people looking to buy the product will naturally google for the product online for a review if their looking to make a purchase.

These people are HOT and are very late in the sales funnel cycle meaning they are most likely to buy the product but their looking for maybe a good review first or an incentive to buy the product.. and that's where you come in :)

So what does that mean for you?

This simply means that there are tons of products to promote and easy affiliate commissions to be made. Seriously... very **EASY** affiliate commissions, no selling required at all!

How Can you implement this Free traffic strategy Right now?

1) Head over to Jvnotifypro.com or Muncheye.com, this is site where product creators will announce their upcoming product launches.

[Www.jvnotifypro.com](http://www.jvnotifypro.com)

There will be dates for each product launch in the next 3 months . What you need to do is just view each of the product and choose which offer you would like to promote. Here's a screenshot.

Here is the thing though, because the product has not been launched yet and you obviously can't review the product just yet, what you can do is some research about the product creator and based on that create a review of the upcoming product launch and tell them that you offer a bonus if you buy the product via your affiliate link.

Create youtube videos with the right meta tags & keywords

Why youtube videos? Because they rank so well on the search engine and there is so little competition when it comes to youtube videos.... trust me it so easy to rank youtube videos. This free youtube traffic strategy is so simple but often overlooked.

Basically there are 3 types of videos you can create

1) Screencast (Screen recording Like my video) – You can use <http://www.techsmith.com/jing.html> which is free.

2) Record a video of yourself talking (easiest to do) 3. 3) Create a slideshow (you can do this with many free softwares out there) **Types of Bonuses you can offer in your video** 1. 1) Give away PLR, MRR , RR products (easiest to do) 2. 2) Offer Free 1 on 1 Coaching Session Via Skype **Summary of this strategy**

1) Choose a product you would like to promote in jvnotifypro.com

2) Create a youtube video about the product and offer an incentive for buying the product using your affiliate link.

3) Upload the youtube video and include all the relevant text on the description area of Youtube, be sure to include the product title in your video.

Give it a couple of days for your video to rank and make sure to include your affiliate link in your youtube video description.

What happens next?

Upload the video and move on to the next video, keep repeating the process and learn how you can eventually scale this business model. You can definitely outsource your video creation later on once you have a system in place. Just insert the affiliate link and/or PROMO page in your youtube video.

How much traffic do I need?

With the right traffic you don't need much traffic at all, with this strategy most of the traffic that found your youtube video are HOT prospects.

How much can I make?

As much as you want seriously, I have many \$100+ days with this method/strategy and if you have a lot of websites promoting "evergreen" products you're going to watch your commissions grow and grow as you do more and more of these.

How FAST can I see results?

Many times within days, sometimes within the same day :) Affiliate sales will be at it's peak during launch time and slowly trickle down post launch.

Speed things up!

Use the Commission Gorilla software ... it takes minutes (nothing to download either) and a real time saver if you want to do this fast. Even if you don't plan on exploring affiliate marketing just yet, this software will definitely come in handy in the future.

Either way, give it a go... it's so easy and fail proof in my honest opinion :)
